

# Frontend web developer job description

18/4/22 | Thessaloniki, Greece

## Company Profile:

Rhoé is a startup that works with large enterprises, research institutes and local and national governments to build optimization software products that bridge carbon-neutral forms of energy with bleeding edge transportation technologies. Rhoé is currently leading the optimization work packages in two multi-million-euro EU projects. Additionally, we are helping electrify 34 Greek municipalities by designing their electric vehicle charging infrastructure plans. Rhoé has worked with partners across Europe, ranging from research institutes (e.g., Fraunhofer Institute, City University of London, Madrid Politechnic) to industrial powerhouses (e.g., Wartsila, Comau, Blackstone) and local governments (e.g., Madrid, Milan, Amsterdam, Rotterdam). Rhoé has received multiple awards (e.g., top 30 ICT startups in Greece, top 15 mobility companies in Greece) and honours (e.g., PM's business trip to North Macedonia) for both of its product innovation as well as its insightfulness in business strategy.
